Petition for Urgent action at Jervis Bay Rd/Princess Highway Intersection

Petition summary and background	<p>Apparently, it is no one’s responsibility amongst the planners, or decision makers to act on the unintended consequences of increased traffic at the intersection generated in part by population increases, changing demographics and highway improvements, including:</p> <ul style="list-style-type: none"> ○ Communities to the east of the Princes Highway being locked in by the volume of traffic heading south and treacherous access points; ○ The economic viability of people and small businesses being stifled by access delays and uncertainty; ○ Isolation of older drivers fearful of navigating the congested intersection safely; ○ Stress on public and school bus drivers meeting timetables and being responsible for the safety of their passengers; ○ Outbreaks of ‘road rage’ as those with a sense of ‘right to immediate passageway’ object to confused, unsure or ultra-safe driving patterns; ○ Dislocation of the movement of personnel essential to the operations of HMAS Creswell and HMAS Albatross; ○ More people using unsafe “rat runs” as they choose other unregulated entrances to the Highway to avoid the long queues at the Jervis Bay intersection.
Action petitioned for	<p>We, the undersigned, are concerned citizens who urge the NSW Government to act now to ensure:</p> <ol style="list-style-type: none"> 1. the need of all road users to have a safe and efficient passage at the Jervis Bay Road and Princess Highway intersection 2. the immediate modification of the right of Princes Highway traffic to create a barrier to those entering the highway from Jervis Bay Road 3. the establishment of a ‘grade separation’ solution as early as possible.
